

Best Practices

1. Tree Plantation

The College through its NSS and NCC units plant a large number of trees in the campus. Tree plantation is a regular feature of the college to maintain the Eco-system. They have planted a variety of trees in the college, which have contributed to the beauty and greenery of the campus.

2. Plastic free campus

Attempts have been taken to create a hygienic and plastic free campus. The institution encourages the students to understand the gravity of the use of plastic footprints by creating awareness in this regard. The college unit of NSS is active for constraining of plastic pollution. The NSS units organises camps not only in the college but also in surrounding areas and spread awareness about the plastic usage which endangers the environment. The college contributes by restricting the use of plastic bottles and other stuff.
